

Gearhead Garage Do It Yourself Auto Repair Relocation to Expand our Offerings

Gearhead Garage is moving to a new location March 1, 2019

Colorado Springs, Mar 22, 2019 (IssueWire.com) - The popularity of the only DIY Garage in Colorado Springs requires we expand to accommodate our Gearhead Clients. Our new location will provide over 2000 additional square feet allowing for an additional 3 bays.

Our new location will be 1453 Woolsey Heights in Colorado Springs a mere 1.8 miles from the current location. The new facility is updated with led lighting, larger doors to accommodate those big projects, and more space for additional availability. We will be moved into the new location by March 1, 2019. We do not expect to close during our regular hours as the move takes place, we will be coordinating location details with our customers as appointments are confirmed.

Gearhead Garage opened in July of 2016, a full service and repair facility with a special twist. Gearhead Garage also offers DIY Tools and Lift rentals with certified mechanics standing by if needed. It was back in 2016 the owners (one Disabled Veteran & two Professional Business Women) decided customers needed more options for car repairs. As soon as the research into DIY shops started, we got very excited and couldn't wait to offer these services to our customers, neighbors, and friends here in the Pikes Peak Region. Many of our customers were capable mechanics but had nowhere to complete their own repairs, our military clients were far from home and did not have their tools, our parents wanted to teach their soon to be drivers about car basics and needed a safe environment to do so. Gearhead provides indoor space to complete most projects large and small.

We love to give tours of our shop please feel free to drop in at 1453 Woolsey Heights in Colorado Springs Lisa or Danny will be happy to show you around. If you are ready to book some bay time for that project you have been putting off visit our web site www.gearhead-diy.com and you can book your space on line.
