

Hip-Hop Artist Cocky Streetz New Song 'Pounds' Is the Anthem for the Young and the Restless

The contemporary thematic depiction in Cocky Streetz' new song 'Pounds' is a poetic underdog of some of the best arrangements of lyrical and sound arrangements.

Charlotte, Dec 31, 1969 (IssueWire.com) - There is a sense of semantic appreciation through a groovy beat of the modern-day musical nuisance that has been portrayed beautifully and skillfully in **Cocky Streetz**' newly released song '**Pounds**'. A proprietor of marijuana and its significance in the extant pop-culture, this song is promotional in many ways. However, apart from the use of this

thematic interpretation, there are many more layers to the song which is a tribute to the cultural resurgence of the modern paranoia. **'Pounds'** may sound superficially light at a glance, but it draws a beautiful picture of how marijuana has its connections deep rooted in creativity.

Based out of North Carolina, **Cocky Streetz** has managed to catch the essence of the generation and create music befitting the structural norms of today's audience. His passion for his work brims throughout his tracks, something that makes him stand out as an artist. Crossing over the pre-conceived lines of rap and hip-hop, **Cocky Streetz's** madness and love for his work put him at good risk of encapsulating the world in a loop with his songs.

A versatile deconstructor of art and life, **Cocky Streetz** has tried his hands at many songs prior to the popularity of **'Pounds'**. 'Cole Bennett', 'All My Life' and '2moneyz' are some of the most prominent songs of his career that defines his eccentric style better than anything else. Today, one album and numerous EPs, singles and collaborations later, his popularity gradient is only on the rise to global stardom. Be part of this transitional musical flow by following his work on Spotify, YouTube, [Facebook](#), [Instagram](#), and [Twitter](#) right away.
