

## Intelli-shade® Automated Interior Shading Systems Provide A Safer Home for your Family.

**Phoenix, Mar 20, 2019 ([IssueWire.com](http://IssueWire.com))** - Looking for motorized interior shades that provide child safety, privacy, security, UV protection and glare reduction with simple control options? Then look no further - Intelli-shade® is here. The Intelli-shade® line of wireless, cordless, fully automated window shading systems provides a high level of child safety, as well as security, comfort & convenience in your home.

Motorized shades are a sound investment for any home. They provide the utmost in safety & convenience - especially if you have hard-to-reach windows and/or children in your home. Our Child Safe™ systems are much safer for children - since they don't have potentially dangerous cords (that are a very serious strangulation risk for young children).

Having motorized window treatments also allows you to automate a repetitive task that is key to the comfort that you experience in your home. Intelli-shade® allows you to adjust your window treatments with voice control or the touch of a button - at home and remotely. You can even enjoy the benefits of fully automated functionality, so you never need to provide a command at all.

If you are interested in maximizing your home's energy efficiency & security, Intelli-shade may be just what you've been looking for. Opening and closing your shades is much more than simply blocking or letting light into a room. Put your shades to work and realize the savings when your energy bill arrives.

The Intelli-shade® product line can be opened and closed by simply speaking a command or utilizing a wireless keypad or hand-held transmitter. These very modern & efficient shading systems are a proven way to reduce solar gain and prevent heat loss - and if they are this easy to open and close, it's much more likely you will maximize benefits. Additionally, the ability to set schedules to open and close them at specific times means you never have to worry about them at all.

### About Intelli-shade

Intelli-shade® is an environmentally conscious technology company based in Phoenix, Arizona - whose focus is to improve your quality of life at home – by providing child safe window shading systems that create a safer, more comfortable, relaxing and secure environment for you and your family at home.
