

## Jerry Consiel Joins Retronix Semiconductor Team as New Regional Service Manager for Oregon

**Hillsboro, Mar 19, 2019 ([Issuewire.com](http://Issuewire.com))** - RETRONIX SEMICONDUCTOR is pleased to welcome Jerry Consiel as the new Regional Service Manager for Oregon.

“This new addition to the global team follows the natural evolution of our strategy as we branch out our operations across the United States to continue to effectively serve our clients and customers in Oregon and the surrounding region,” said Dennis Rooney, chief financial officer and VP USA, “We anticipate that Jerry’s involvement will facilitate the high-volume hiring demands of the semiconductor manufacturing fabs in this area.”

Jerry Consiel joins the Regional Service Management team alongside Michelle Blanco who oversees operations on a national level with a focus on operations in US Central and Eastern regions; Christopher Choffat who manages operations with customers and clients in Arizona; EMEA manager James Jamieson, and Israel manager Erez Fayna.

To Retronix Semiconductor, Jerry brings over 18 years of semiconductor industry experience having served in operations and project management roles with Applied Materials, Principal Service Solutions, ASM, and Westerwood Global.

Jerry holds an MBA with a minor in Project Management and has also achieved a Bachelor of Technology in Information Technology as well as an A.S. Electrical and Electronics Engineering degree. Combined with his semiconductor engineering management background, Jerry is well-suited to taking on the project challenges faced by Retronix Semiconductor customers and clients in Oregon with a knowledgeable and conscientious approach.

“I am passionate about safety culture, quality, and the profitability of my customers and clients. I have experience in project management and dedicate myself to seeking out and effectively troubleshooting resource and process issues encountered in high-volume manufacturing environments.”

### **About Retronix Semiconductor**

[Retronix Semiconductor](#) is experienced global engineering services and general contractor company serving the semiconductor and high-tech manufacturing industries. Offering efficient and effective flexible labor, equipment installation, tool decontamination, harvesting, and relocation, as well as facility support for the world’s leading OEMs and IDMs since 1992.
