Acupuncture is a system of health care that has been developed, refined, and practised in China for over the past 4,000 years. In ancient times, acupuncture, along with herbal medicine, was used as the primary method of treating injuries and illness. It involves the superficial insertion of hair-thin needles into points on the body that have been proven to relieve pain and disease. Nowadays, most people come to an acupuncturist for medical problems that do not respond well to western medicine (ie. Drugs, surgery, pain killers, etc.). Roberto focuses on Acupuncture, modern homoeopathy, Medical QiGong, Clinical Nutrition, Herbal Medicine, Bio-resonance testing, Neuro-muscular rehabilitation, and Cold-Laser Therapy. He attributes his professional success to quality patient care, helping his patients lead a healthier life. He is always learning and continuing his education to improve his practice so that his patients are always getting the best care possible. When he is not working he enjoys spending time with his family.
