

Officials Say Flu Season Could Last Until May

Information on New Ways to Fight Flu

Newark, Mar 4, 2019 (IssueWire.com) - FLU SEASON COULD LAST UNTIL MAY

VIATREXX OFFERS INFORMATION ON HOW TO NOURISH THE IMMUNE SYSTEM

Flu season continues in the United States with a more severe strain now accounting for half of all new cases and it could last until May, according to the Centers for Disease Control. Viatrexx, a leading integrative company based in Canada and the U.S, is now offering medical professionals and patients the opportunity to learn more about the metabolic-factor based remedies.

According to CEO and President Stephen Emond, "Viatrexx helps nourish the immune system.

While most products attack the "bug", they leave the immune system weakened." Emond adds, "Viatrexx-Immunexx works by mimicking the immune system, nourishing the immune system, and populating it with the molecules it recognizes."

"I see excellent results using the unique Viatrexx line. Immunexx has been especially helpful for some of my most sensitive patients with compromised immune systems," says Ginger Nash, ND. Dr. Nash is a women's hormone expert with 20 years of clinical experience. www.feminology.org

According to company officials, Viatrexx products have been scientifically designed with a team

of international experts and synergistically balanced, meaning internal tests were conducted to ensure the ingredients and strengths are optimal. The company's proprietary manufacturing also provides metabolic factors, biodynamic organo and herbal components. Viatrexx-Immunexx is registered with the FDA.

Standard protocol is four squirts, 3 times per day. The remedies may be

taken together or added to water. Viatrexx-Immunexx may increase to ten squirts, 10 times per day when there is a cold or flu challenge.

Each month, the company offers specials. For the entire month of March, buy 6 bottles – get one free; buy 15 - get 3 free, buy 24 - get 6 free. To speak with a Viatrexx team member, call 888-337-8427 or visit the website, www.viatrexx.com.

ABOUT VIATREXX Viatrexx is a wellness company and manufacturer dedicated to developing and manufacturing integrative oral, topical and injectable formulas which specialize in addressing key pillars (drainage/detox, repair/regeneration, metabolism/oxygenation and emotional/traumatic scars) which may be linked to underlining causes and regeneration. The products and proprietary manufacturing methods mimic the body's natural healthy biochemical processes and balance, thereby providing remedies which may have a profound impact. Viatrexx is headquartered in Canada and the United States. *These statements have not been evaluated by the Government Authorities. These products are not intended to diagnose, treat, cure or prevent any disease.*
