

Online Marketing Expert Arlen Bento Jr. Develops New "HOT" Service For First Page Google Placement

How is this small digital marketing business in Stuart Florida getting businesses on the first page of Google search with no upfront fees?

Stuart, Mar 8, 2019 (Issuewire.com) - Online marketing expert Arlen Bento Jr. in Stuart, Florida has developed a new "HOT" service for helping businesses rank on the first page of Google search. He calls this service [SEO Video Creation](#) and it's working incredibly well. Unlike a normal video that is created for business, an SEO Video is created with specific SEO techniques that are receiving first-page rankings from Google.

For many businesses that offer products and services outside of their local area, it is almost impossible to rank on the first page of Google in a non-local market because of massive competition from other local businesses and much larger companies. However, with this new SEO Video Creation service ranking on the first page of Google in a local market and outside a local-market is now a reality.

SEO Videos are created using new state of the art software that features 3D Avatars and text to speech technology. The text to speech technology gives the 3D Avatar a realistic speaking appearance that allows the implementation of specific SEO techniques. Long tail keywords and GEO specific signals are used to create the SEO Videos.

"Google has placed a lot of emphasis on local searches recently, our new [SEO Video Creation](#) service is at the cutting edge of current Google algorithms for placement in local searches and outside of local searches." - says Bento

The best part of this new SEO Video Creation service is that it cost nothing up front to the business.

Yes, that is not a miss print, no upfront fees!

"So many businesses get calls and emails every day from marketing companies promising Google first page results that never happen, we decided to offer our SEO Video Creation with no upfront fees, if we can't get you on the first page of Google, you don't have to pay." - says Bento

This new SEO Video Creation service with no upfront fees has been a "No Brainer" for many businesses. For many smaller businesses, it has become almost impossible to rank on the first page of Google outside of their local market, right now, [SEO Video Creation](#) is leveling the playing field.
