

PassUp - Online Classified Script

Letgo clone

Madurai, Mar 17, 2019 (Issuewire.com) - Right momentarily, Trioangle Technologies announcing the new release of the [PassUp - Letgo Clone](#), based on the concept of online classified platform. It gets

revamp birth from Letgo with the stunning workflow. PassUp presented with powerful and fired up features for both entrepreneur and users.

Let's have brief notes of PassUp

Pass Up is an excellent script which is well suited to buy and sell the concept of products and services incorporated with extremely packed with the latest technologies. The best aspect of PassUp is location-based, which provides a better platform for the seller as well as the buyer. Our script is gemmed for the entrepreneur and plays a unique role from the competitor. In both the mobile technology PassUp launched, that is Android and iOS application. With this sophisticated app's user merely surf to buy or sell the products.

Features in PassUp

Smooth Sign-Up/ Sign-In:- Having a rocking enjoyment with PassUp shopping, for that user has to merely sign-up/sign-in with Facebook or Mail Id to surf the website.

Advanced filter:- The recently uploaded products or the product that is available near to your location can be easily filtered out using the advanced filter option. Also can sort the product list using the price from low to high or high to low.

Search easily:- In the sites of [PassUp](#), each product are categories like services, cars, tech, motors, home, etc. From that, the users can catch out on the product as their wish.

Message Support:- If the buyer willing to buy products for the seller but at the same time the buyer eager to communicate with the seller related to the product, our message support option is the trump-card among them.

Social Media Sharing:- The buyer can share vogueish products on social media such as Facebook or using any other platforms with their friends.

Can Upload Images Fastly:- Within a fraction of seconds, the user can upload the product for sale.

Post Easily:- Can add the catchy description, title, price and add the product for sale without any hassle.

Bump Feature:- The seller can make use of bump option for their products to place at top ranking on the websites and can improvise the sales rapidly.

Can Add or Delete the Product:- Within a tap can add or delete the details of the product according to the desire.
