

Registered Nurse Colleen M. John, RN, BSN who Resides in East Windsor, New Jersey Area

Get to know Registered Nurse Colleen M. John, who serves patients within Richmond University Medical Center in Staten Island.

New York City, Mar 7, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Registered Nurse Colleen M. John currently practices with the Richmond University Medical Center in Staten Island where she holds expertise in Neonatal Intensive Care Unit. Colleen has been a practicing nurse since 1987, giving her over three decades of experience in her field.

Richmond University Medical Center (RUMC) is a 470+ bed healthcare facility and teaching institution serving borough residents as a leader in the areas of acute, medical and surgical care, including emergency care, surgery, minimally invasive laparoscopic and robotic surgery, gastroenterology, cardiology, pediatrics, podiatry, endocrinology, urology, oncology, orthopedics, neonatal intensive care and maternal health. The medical center earned The Joint Commission's Gold Seal of Approval® for quality and patient safety.

Colleen graduated with her Bachelor of Science in Nursing from Rutgers University. She holds additional certification as a Registered Nurse. To stay up to date in her field, she remains a professional member of the Academy of Neonatal Nursing. The mission of the Academy of Neonatal Nursing is to provide high-quality education for health care professionals working across all levels of neonatal care to

improve outcomes for newborns and their families. The Academy of Neonatal Nursing achieves this mission through professional, peer-reviewed publications, national conferences, online resources, and other educational offerings in order to advance the knowledge of its members in providing superior patient care.

Colleen attributes her professional success to her desire to teach and educate patients.

Neonatal nursing is a subspecialty of nursing that works with newborn infants born with a variety of problems ranging from prematurity, birth defects, infection, cardiac malformations, and surgical problems. The neonatal period is defined as the first month of life; however, these newborns are often sick for months. Neonatal nursing generally encompasses care for those infants who experience problems shortly after birth, but it also encompasses care for infants who experience long-term problems related to their prematurity or illness after birth. A few neonatal nurses may care for infants up to about 2 years of age. Most neonatal nurses care for infants from the time of birth until they are discharged from the hospital.
