

Rising Star ItsThePACE hails from Toronto with his debut ALBUM "Perceptions"

ItsThePACE releases his debut Album

Toronto, Mar 10, 2019 (IssueWire.com) - The Canadian music scene gets a bionic-upgrade in 2019 as itsThePACE, Toronto's newest Hip-Hop commando, smashes onto the battleground and seizes urban culture by the throat.

After a decade of war-room strategy, rap's most vital voice is poised to nuke the landscape with his

debut album "Perceptions". A Molotov Cocktail of versatility infused with post-millennial rage, Perceptions is a call to arms; Pace has been planning for a very long time for what's about to happen.

With his opening singles, Stack Em Up and Rapper ItsthePACE sears the unwary with an inferno of past agony; a childhood surrounded by violence, drugs and family business of prostitution. Yet it's how he dealt with adversity that makes ItsthePACE unstoppable. He experienced all levels of hardship and proved that anyone can accomplish whatever they put their mind too. ItsthePACE has warred through an upbringing that should have left him another statistic of his environment yet he pushed forward.

But there is always hope outside the echoes of battle and what truly makes Perceptions so vital is the infusion of positivity. ItsthePACE may well be Judge, Jury and the Predator, but his music is the soundtrack for a jilted generation; an assurance that beyond each ghetto and gang there is justice and life-after-theft for those with the guts to choke-out their demon and sneer in its face.

Perceptions dropped February 8th and ItsthePACE has Three more projects dropping before the summer ends.
