

Hasan Badday, MD, Pain Management Specialist with Pacific Pain and Regenerative Medicine

Get to know Pain Management Specialist Dr. Hasan Badday, who serves patients in Irvine, California.

Irvine, Apr 16, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Dr. Badday is a board-certified and fellowship-trained interventional pain management specialist and stem cell surgeon who is recognized for his exceptional skills and patient care. He is currently serving patients at his comfortable and modern office - Pacific Pain and Regenerative Medicine - located in Irvine, California.

At Pacific Pain and Regenerative Medicine, Dr. Badday helps his patients with proven pain management treatment options such as facet joint injections and epidural injections, so that they can live full and active lives. He also helps them to manage their medications and offers innovative treatments, including stem cell therapies for joint and muscular pain and Botox® treatments for chronic headaches.

Dr. Badday received his medical degree from the Poznan School of Medicine in 2007. He completed a

residency program in Physical Medicine and Rehabilitation (PMR) at Georgetown University, as well as a Fellowship in Spinal Intervention at the same university. He also completed an internship in General Surgery at Grady Hospital.

Dr. Badday is a Diplomat of the American Board of Pain Medicine (ABPM). The mission of the ABPM is to serve the public by improving the quality and availability of Pain Medicine services.

Dr. Badday holds professional memberships with several organizations, including the International Society for Cellular Therapy, the American Medical Association, the American Academy of Physical Medicine and Rehabilitation, and the American Society of Interventional Pain Physicians.

Pain management, pain medicine, pain control or algiatry, is a branch of medicine employing an interdisciplinary approach for easing the suffering and improving the quality of life of those living with chronic pain. A pain management specialist, like Dr. Badday, is a doctor who specializes in pain medicine, focusing on the evaluation, treatment, and prevention of pain. Dr. Badday has cared for patients with a wide variety of spinal and musculoskeletal conditions and has performed thousands of spinal pain injections.

Stem-cell therapy is the use of stem cells to treat or prevent a disease or condition. As a stem cell surgeon, Dr. Badday performs procedures in which a patient receives healthy blood-forming cells (stem cells) to replace their own that have been destroyed by disease or by the radiation or high doses of anticancer drugs that are given as part of the procedure. The healthy stem cells may come from the blood or bone marrow of the patient, from a donor, or from the umbilical cord blood of a newborn baby.

Dr. Badday attributes his success to the curiosity and love for his field. He got into medicine to give back to the community and to improve the quality of life for his patients. In his spare time, he enjoys being a part of Doctors without Borders.
