London, Apr 15, 2019 (Issuewire.com**)** - **HireFaster** launches the first portal to provide 5-years real-time reference checks and onboarding. Founder & CEO: Sara Statman, spent over 20yrs in Financial Services (front office, analytics, risk, governance and regulatory compliance), which are known to have stringent onboarding criteria. It was during her time contracting that she noticed several key pre-employment screening issues:

- Recruiters ask sensitive data (proof of ID/Address) to be sent in plain text e-mail and e-mail the same sensitive data to referees, leaving data subject to cyber attack
- Candidates may face weeks unpaid waiting for pre-employment onboarding to complete
- Candidates repeat forms for each supplier in the chain (Recruiter, Consultancy, End-Client), which does not foster engagement

The recruiter perspective is manual checks may take 4-8 hours per candidate and delays in start dates increase costs per hire. HireFaster addresses each of the above and provides an institutional quality platform.
