Dr Aranda is Certified in Critical Care Medicine and Anesthesiology by the American Board of Anesthesiology. The mission of the American Board of Anesthesiology® (ABA) is to advance the highest standards of the practice of anesthesiology. As the certifying body for anesthesiologists since 1938, the ABA is committed to partnering with physicians to advance the lifelong learning and exceptional patient care.

Anesthesiology is the practice of medicine dedicated to pain relief and total care of the surgical patient before, during, and after surgery. It encompasses anaesthesia, intensive care medicine, critical emergency medicine and pain medicine. An anesthesiologist evaluates, diagnoses, and treats all different types of pain. Pain is a wide spectrum of disorders including acute pain, chronic pain and cancer pain and sometimes a combination of these. Pain can also arise for many different reasons such as surgery, injury, nerve damage, and metabolic problems such as diabetes. Occasionally, it can even be the problem all by itself, without any obvious cause.
