

Pure Beauty Skin Bar Summer Products Create, Maintain and Protect Your Glow

Pure Pre-Cleanse, Cucumber Refreshing Mist, and PBS UV 30 For All Types of Skin

Cincinnati, Apr 17, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Pure Beauty Skin Bar (PBS) founder and skin expert Sylvia Brownlee and her innovative team design essential products to create, protect and maintain your summer glow.

To ease or prevent the negative effects of the harsh summer weather, Brownlee suggests *Pure Pre-Cleanse*, *Cucumber Refreshing Mist*, and *PBS UV 30* to aid in prepping, protecting and soothing the skin from the sun's damaging rays--a jumpstart to becoming sun savvy.

"The laid back days of summer doesn't mean we should be lazy with our skin care regimen," states Brownlee. "In fact, we should be more diligent because the sun's rays are strong and capable of

damaging the skin in as little as 15 minutes.”

Healthy summer skin starts with cleansing properly. To prep your skin for cleansing, PBS’ *Pure Pre Cleanse* oil will nourish and pre-cleanse the skin to remove makeup and debris. The smooth lightweight silky substance allows you to remove your makeup without the worry of clogging your pores or causing breakouts.

The Cucumber Mist (toner) is a hydrating essential mist for parched and tired skin will perk up the skin immediately. With ingredients as aloe leaf and cucumber fruit, it is also great for setting your makeup. Brownlee created this to wake up and refresh the skin. Hint—It feels even more amazing if you keep it in the fridge. Simple to use, and for the best outcome apply it to a freshly cleansed face before serums or moisturizers.

Brownlee stresses the importance to protect your skin outdoors and that the PBS UV 30 is the best protection against harmful rays. It also keeps those dark spots from getting darker.

“As the seasons’ change, your skincare routine is something you should adjust to make certain you’re giving your skin the nourishment it needs, based on the weather,” states Brownlee. The best part about PBS UV 30 sunscreen is that it’s lightweight, smooth, doesn’t leave a white cast on your face like most sunscreens and it gives you an amazing glow. “It’s the best of both worlds,” Brownlee adds.

It’s also oil-free, moisturizing, and non-greasy but, for ultimate results be sure to emulsify it in the hands before applying, as this is the key to not having too much and getting it applied properly. Make sure to apply it liberally on the face 15 minutes prior to sun exposure. Also, reapply it after sweating and swimming and reapply it every two hours when in the sun.

Your skin is your body’s most prominent organ. Taking care of your skin and using effective products will keep your skin glowing with good health all year round.
