OFFER

Nr: A111
Date: 10/24/2018
Customer Nr: XYZ054321
Consultant: Alan Dave
Tel.: 001.1.1222222

Ladies and Gentlemen,
we thank you for your inquiry and submit subsequent offer:

Pos.	Description	Amount	Unit	Price Unit	Total price
1	Flaring clip 31 x 31 mm	5,00	Pack	15,995	79,975
2	Connection clamp 31 x 31 mm	5,00	Pack	14,995	74,975
3	Orderings, galvanized with frame Measure: 1200 x 600 mm; 30 x 30 mm	7,00	Piece	55,995	391,965
4	Nails	8,00	Pack	1,005	8,040
Sum:					552,955
VAT 10%					55,295
Total					608,250

Check it please

Our offer is subject to confirmation, except if otherwise stated in the order confirmation or expressly acknowledged by us in writing.
Do not hesitate to contact us for further questions at any time.

Best regards
ALAN DAVE

Frankfurt, May 6, 2019 (Issuewire.com) - *Without a document management software is really complicated to keep track of everything. Accounting, customer care, inventory optimization, ordering, tax, competitors, staff and so on and so forth. Everything is connected with correspondence and this both in analog and digital form.*

Before the documentary era, and since the dawn of humanity in the digital age about thirty years ago; companies, public authorities, and individuals are struggling to combine the two worlds. Although it is foreseeable that the analog form of correspondence and documentation will come to an end in the near future, it will be necessary to reconcile both. But not only that, at the same time the analog past has to be digitally archived. Folders, files, and documents that have to be stored for legal or corporate reasons and are hidden in sometimes barely accessible basements.

Document management system PaperOffice – The future is digital

Probably the best way to avoid the chaos in the office is the use of document management software, DMS for short. Since it is wise to benefit from the accumulated knowledge of others, the sense of a DMS that has been around for quite some time makes perfect sense. Since the PaperOffice experiences can certainly be seen.

- Over 900,000 users of the document management system
- In 53 countries of the world
- Over 17 years of experience in the document management sector

Taking advantage of the PaperOffice experience means using document management software that includes everything needed. At the same time, however, PaperOffice is not a DMS, which is so complicated that now all employees including the boss have to be sent to longer training courses.

<https://www.youtube.com/watch?v=qWFqDVFU9W0>

The team of PaperOffice uses the experience accumulated over the years as well as the feedback from their customers to constantly improve PaperOffice. Therefore, the experience of the document management manufacturer PaperOffice for the users is positive experiences. This DMS builds logically and starts where it is important. For example, when scanning documents, which is possible with PaperOffice on any device that has a camera, not only by the scanner, but also on the smartphone or tablet. Of course, regardless of the operating system. The use of OCR full-text recognition, which also works with keyword indexing, is by no means the norm, but an idea owed to the PaperOffice experience. Keyword indexing, in turn, serves as the foundation for PaperOffice's internal high-performance search engine, which instantly finds every document, whether scanned or already digitized. Just as important, experience teaches, is the link with other office software such as ERP, MS Office or CRM.

Document management software PaperOffice – Safe from experience

It is also part of the PaperOffice experience to invest in software security. For example, by data storage on a local server / NAS and not on the cloud of a third party. With an additional 1024bit AES encryption, which is also used by the military, all data is protected from unwanted eyes.

Document management system PaperOffice and NAS from Synology form the perfect team. With a NAS from Synology, all data remains in your own hands and every data path is traceable and under control. The intranet, the company's Internet, is the safest and fastest way to make your own data available to employees. In turn, PaperOffice document management provides data management software that simplifies the management of all information from input to editing and storage to availability. Safety is always top priority.

With the document management software PaperOffice, everyday office life can be perfectly organized, as the program is scalable from a single-user application to 800 network locations where workflows can be sent to each other. Last but not least, PaperOffice complies with the tax code and with the latest data security legislation GoBD and GDPdU. The experience from Document Management Maker PaperOffice also taught to the creators that price is a deciding factor regarding why this DMS is the price-performance winner among its class.
