

## ezTalks Newly Introduces Automated Webinar to Help You Get Better Results

**Dayton, May 16, 2019 ([IssueWire.com](http://IssueWire.com))** - ezTalks Technology Co., Ltd., the leading video conferencing & business collaboration provider, newly introduces the long-awaited and immaculate [Automated Webinar](#) feature to its web conferencing platform. ezTalks always shows overwhelming commitment to providing users with one-stop webinar services and exceeding the expectation of every user. The novel Automated Webinar feature comes with the same pursuit.

### What is Automated Webinar?

Automated Webinar is a pre-recorded, live simulated online webinar that you can host anytime with minimal resources. In an automated webinar, you can set a particular time for your webinar to automatically start. Using this function, you can prepare everything at the top-notch level before you publish it at specific times on specific dates. It empowers you to use automated webinars to onboard your team members or customers, create simulated live courses, boost automated sales funnels, generate automated leads and income, and more.

By taking advantage of the Automated Webinar feature, the ezTalks Webinar platform now proudly offers a series of webinar types to its users- Live Streaming, Automated Webinars, and On-Demand Webinars.

## Why does ezTalks offer Automated Webinar feature?

Automated Webinar has been being adopted by more and more people and businesses as it helps to avoid technical issues, increase productivity, give more freedom and so on. More main aspects that appeal to the users are as follows:

### Automated Webinars Free Your Time up

Automated webinars are streamed in real time with the look and feel of live with no need to have you to be there. Have you ever met with the situation that your time zone is different from that of your target audience and you happens to be busy or sleepy when the highest proportion of people in their time zone will be able to attend your webinar? In that case, to run a live webinar on a regular schedule can be sometimes time-consuming and taxing. But enabled with [automated webinar service](#), all you need to do is upload the webinar session after all was said and done and it will be streamed live automatically as planned. Thus the host is not required to be present in the automated event, which could save lots of time and energy.

### You Can Make It Absolutely Perfect

The biggest fear most people have before [hosting a webinar](#) is that they will screw up. According to the Chapman University Survey on American Fears, “public speaking” is their biggest phobia - 25.3% of the Americans say they fear to speak in front of a crowd. Though they’re not directly in front of an audience, in a live session, this will still affect your ability to perform in effective communication and presentation and make others feel “you’re amateur”.

With automated option provided by ezTalks Webinar, you can focus on working out the perfect webinar without any fear of making a mistake. That is to say, you can even edit the best shots from multiple versions so you get the most impressive version possible. Even though automated webinars are pre-recorded, they are still seen as live events because each person invited will access the webinar at a specific time, just like a real live webinar. The absolutely perfect webinar you hosted can definitely leave a good impression on the audiences.

### Automated Webinars Mean Automated Incomes

There is a way to create an automated stream of income- automated webinars are created to turn your strengths into a revenue generator in combination with ezTalks paid webinar feature. The more people attend your events, the more money you can get. Even you’re sleeping, the webinar that is running automatically as planned is still raising money by paid webinar registration. An automated webinar could mean an additional source of revenue for your business. You’re getting more with ezTalks Automated Webinar!

### Pricing Plan

Automated Webinar feature is included in Pro and Business webinar plans which start at \$32/mo/host

for 100 participants. You can now deliver automated webinars flawlessly and efficiently in a cost-effective way.

As long as you get ready for your automated webinar and understand your market, it can bring more beyond your expectation for your business of any kind. To start hosting attractive and amazing automated webinars, you can check out ezTalks [free sign up](#) to get started.
