

Online Assessment Software, Think Exam 4.0 introduces new features on its panel

Think Exam comes with “Question types” and “student report” features for Educators

The screenshot displays the Think Exam 4.0 interface. At the top, there is a navigation bar with the 'think exam' logo and tabs for Dashboard, Question, Test Manager, Product, Candidate, and Report. Below the navigation bar, there are sub-tabs for Question, Import Question, and Subject. The main content area is divided into two panels: 'Question Entry Options' on the left and 'Question Details' on the right. The 'Question Entry Options' panel includes dropdown menus for '*SELECT SUBJECT' (set to Abbreviations), '*SELECT TOPIC' (set to asd), and '*QUESTION TYPE' (set to subjective). It also has fields for 'LANGUAGE' (set to English), 'TOTAL QUESTION' (set to 0), and 'CURRENT QUESTION NO' (set to 1). The 'Question Details' panel has a section for '*Type Your Question' with a rich text editor containing the text: 'Recently new human body organ 'Mesentery' has been discovered. What is it and its importance for human body?'. There is also a toggle switch for 'IS IMAGE TYPE' and a section for 'Add Explanation' with another rich text editor.

Noida, May 30, 2019 (IssueWire.com) - [Think Exam](#) is the ultimate destination to avail best of features of an [online assessment platform](#). It is a renowned product by Ginger Webs, a company known for its remarkable service and products in online/offline assessment solutions. It has extended its services in various industries such as Government, corporates and educational sectors, automating their assessment process with solutions based on cutting-edge technology.

Think Exam is a customer-centric product and to keep it in line with the changing requirements of the customers it is regularly updated. Its recent update has improvised the “**Question types**” and “**student report**” features on Think Exam.

Two new question types added are-

Subjective type - Now the admin can create subjective type assessments that can be manually evaluated on the platform itself. Subjective assessments extract a clearer picture of the students' knowledge and are best when creating summative assessments.

Image type - The admin can create image-based questions in which the candidate can upload image in form of png, jpg, and jpeg.

The new add-on in “student report” feature has made an incredible mark in increasing the ease of

admin as well as the candidate. Now the admin can provide video links in the solution report which is visible to the candidate once the test attempt is over. This way the candidates acquire better clarity over the test and its particular solution.

Think Exam has automated the assessment process for around 2000+ clients from across the globe; it has been successfully integrated into schools, institutes, colleges, Government/PSUs and even corporates. It has revolutionized the online assessment process with its remarkable features meant to provide efficiency, ease, and possibility to create as well as assign multiple types of assessments and [online quizzes](#).
