The Leading
Android App Development Company
Accelerates Your Business

Chicago, May 1, 2019 (Issuewire.com) - Today, businesses are turning to mobile apps to expand customer base. It is estimated that Android OS dominates the mobile app development market with over 86.8 % share. In the coming years, it is expected to surge even further. Moreover, the android development platform is undergoing massive evolution which also offers entrepreneurs a scalable and cost-effective opportunity to develop high-end business applications. Therefore, leveraging the benefits of Android application is a necessity for organizations.

If you are planning to develop android apps, you can stop looking further because Moon Technolabs is an award-winning [android app development company](#) creating robust Android applications that helps your business to grow exponentially and improve revenues. They provide expandable and high performing android apps which conform to your enterprise and meet all your requirements. If there is any requirement of transferring your app to a different platform or updating the existing one, their team can accomplish the task with utmost proficiency.

Moon Technolabs have several years of experience mentoring and provides you consultation on nuance of android app development. The leading [android app development company](#) has adept QA experts who always keep an eye on your project till the time it starts working smoothly on all intended platforms. The thorough quality assessment process ensures the app is in a near perfect condition before it hits the market. The dedicated cloud team that works on your project round the clock is within your reach

whenever you want through phone, chat, or Skype. They also provide 24*7 support and maintenance service to their clients.

Moon Technolabs follow two android app development approaches, native android app development and hybrid android app development respectively. Native android apps are platform specific and are written in certain programming development tools and languages. Android studio, Google Material, and Java are used by the developers. The native approach allows access to the device features without dealing with complexity of native plugins. The native app performs better with rendering and animations as compared to hybrid apps. For hybrid android app development, the company uses web technologies like HTML5, CSS, and JavaScript. As hybrid apps are concerned, the same code can serve on multiple platforms as its presence is located outside the basic frame of the application.

Their android apps offer tremendous benefits to businesses regardless of their size. One of the key benefits their android app provides is high ROI with lower costs. Theirs android apps gets deployed faster and can target multiple platforms. Because of its versatility and scalability, the apps integrate with the entire Android ecosystem including smartphones, tablets, wearables, and Android TV. It offers maximum customization features with several additional and in-built security features.

During a press meet, a journalist put forward a question to the CEO regarding how their android app can contribute to the growth of a business. The CEO of Moon Technolabs, Jayanti Kataria replied considerately, *“Their android mobile app services are laid out on the platter of solid and cutting-edge development platform to give businesses an unparalleled edge. They craft their esoteric logical approach pertaining to the customized and personalized need requested by their valuable clients.
