The Cloud Infrastructure Services is bifurcated into a deployment model, service type, vertical, and region. Segmentation wise information includes current and forecasted market sizing (in US\$ billion) along with the regional breakdown for the current and forecasted market sizing. The study focuses on the key geographies including North America, Asia Pacific, Latin America, and the rest of the world. Further, key countries or sub-regions covered under this study are U.S., Canada, U.K., Germany, China, Japan, India, Brazil, and Mexico.

Highlights of the report:

- Market summary, definition, the scope of the study, research process, and market dynamics
- In-depth analysis of the global Cloud Infrastructure Services
- Provides detailed market segmentation
- Current and forecasted market data with detailed analysis
- Market analysis with the help of PEST analysis
- The report presents company profiles with the information that includes company overview, product summary, financials, and recent company developments
- Detailed market understanding based on quantitative and qualitative analysis
- The report provides utmost importance on the market aspects including market drivers, restraints, and opportunities
- Analysis of the value chain analysis for the manufacturer, supplier, end-users, and distributors

Chapters covered in global Cloud Infrastructure Services are:

- Executive Summary
- Cloud Infrastructure Services Market Definition & Scope
- Cloud Infrastructure Services Market Dynamics
- Cloud Infrastructure Services Market Industry Analysis
- Cloud Infrastructure Services Market by Service Type
- Cloud Infrastructure Services Market by Deployment Model
- Cloud Infrastructure Services Market by Vertical
- Cloud Infrastructure Services Market, Regional Analysis
- Competitive Intelligence
- Research Process

Global Cloud Infrastructure Services is segmented on the basis of deployment model, service type, vertical, and region.

Based on the deployment model, global Cloud Infrastructure Services is segmented into:

- Private cloud
- Public cloud
- Hybrid cloud

Based on the service type, global Cloud Infrastructure Services is segmented into:

- Networking as a service
- Compute as a service
- Managed hosting
- Disaster recovery and backup as a service
- Desktop as a service
- Storage as a service

Based on the vertical, global Cloud Infrastructure Services is segmented into:

- Retail & consumer goods
- BFSI
- Manufacturing
- IT & telecommunications
- Healthcare & life sciences
- Government and public sector
- Media and entertainment
- Others

Based on the region, global Cloud Infrastructure Services is segmented into:

- North America
- Europe
- Asia Pacific
- Latin America
- Rest of the World

Key market players profiled under the global Cloud Infrastructure Services are:

- Fujitsu
- Microsoft
- Interoute
- Digitalocean
- Rackspace
- IBM
- Dimension Data
- Vmware
- Oracle
- DXC
- Alibaba
- Google
- OVH
- Alibaba
- Centurylink

Why you want to buy this report:

- Detailed profiles of the industry leading players involving the information including company financials and overview, recent industry and product development
- Global Cloud Infrastructure Services market estimation and forecasting backed by the key primary respondents
- Qualitative and quantitative market information gathered from the various primary and secondary

sources

- To avoid any kind of data variations, the entire market is further examined with the help of exclusive data triangulation methodology
- Region and country-wise presentation of the data pertaining to the market estimated and forecasting
- Analyzing the global Cloud Infrastructure Services outlook with key industry trends and industry evolution
- On-call analysts support

Please note that we can customize the report in case of special client's requirement. Moreover, we can also provide the country as well as region-wise market reports

About Us:

Ricerca Alfa is a leading market research firm and one-stop solution to get the market research reports, in-depth market analysis, and forecasting around the globe. The company has a comprehensive portfolio of research studies from all the domains including medical devices, consumer, IT & telecommunications, chemicals, aerospace & defence, technology & media, consumer goods, and semiconductor among others. We can also customize the report according to the requirement of our client. Our company has partnered with leading publishers and analysts around the world that gives an in-depth study of the current market dynamics with a comprehensive focus on the global as well as regional trend.
