

XYZ Global LLC | Mica Energies Corp: Sign RF Wireless Technology Mou

Smart Wireless Charging

Irvine, May 9, 2019 (IssueWire.com) - Joe Sirimarco, CEO of XYZ Global LLC (parent of retail website www.XYZBUYS.com) and Roman Ostroumov, CEO of Mica Energies Corporation, www.MicaEnergies.com, is pleased to announce the formal signing of a Memorandum of Understanding Agreement (MOU).

The Agreement calls for XYZ Global LLC and Mica Energies Corp to market a new Smart Wireless Charging technology, when available for commercial sale by Mica Energies, on the www.XYZBUYS.com website. The product, when available, is expected to be a leading-edge technology, charging wireless devices. Presently, device mobility is constrained by the charge level of the battery, so by continually charging the battery, mobility will be extended significantly, with a future goal of eliminating power charging cords.

Dan Thomas, CFO of Mica Energies Corporation, said “As Mica begins development of our charging products, we are looking ahead to marketing for consumers, whether business or individual. The sales potential is astronomical. Mica’s differentiation is the ability to take ‘power from the tower’ that is readily available everywhere mostly and harness this energy into charging a battery. We are not relying upon added emitters in homes and offices, which add extra expense and return very limited value if any over a proven standard power charging cord.”

Joe Sirimarco, CEO of XYZ Global LLC, commented that “We are always in search of products and services offering superior value/convenience to our website shoppers, and affiliates. The Mica Energies technology more than fulfills that mission, and XYZ is excited to partner early with Mica Energies in bringing smart wireless charging technology to the consumer, when available.”
