

KINU® Grinders Presents a More Affordable Coffee Grinder: “M47 Phoenix”

M47 Phoenix is a lower price-point entry into high-end grinding.

Berlin, Jun 6, 2019 ([IssueWire.com](http://www.IssueWire.com)) -

- After the fire incident in our manufacturing facility, the scarce resources left, were used to create a simpler to produce grinder that satisfies the high standard of **Kinu®** grinders and more

reasonable pricing demanded by our customers.

From the ashes of our main building, **Phoenix** was born with the mission to put high-end coffee grinding in the hands of as many coffee enthusiasts as possible helping them become better home baristas.

Same internal components as its bigger brother, the Phoenix has a cylindrical body and uses food-safe ABS for some parts. We can more easily produce it; therefore, we can propose it as the most affordable Kinu grinder.

Please visit our website: www.kinugrinders.com for our complete range of grinders.

For more information, please contact: **Michel Nedeff** in Miami at **+1 (786) 602-2263** or write to **michel@kinugrinders.com**
