

## Paws Plus One Announces Stockist of Danish Design Dog Beds

Paws Plus One is proud to be a stockist of Danish Design dog beds whose products are designed by their Danish designer Susanne Mortensen.

**Beverley, Jun 15, 2019 ([IssueWire.com](http://www.IssueWire.com))** - Paws Plus One is proud to be a stockist of Danish Design dog beds whose products are designed by their Danish designer Susanne Mortensen. They are a fellow Yorkshire business who produce some super quality, stylish dog beds. Their range of products has been designed to provide style, comfort, and functionality for the discerning pet and owner.

Paws Plus One loves the countryside, it goes without saying that we adore the countryside theme to the Woodland range and the stylish subtle country colors of green, beige and rich browns in the Newton range. The Tweed range with their earthy colors also brings the traditional feel of the country into your home for your dog to snuggle into.

From puppy to the older dogs, there is something for all breeds and dog sizes. The puppy first bed really is an ingenious design. Puppies grow fast, and this bed has a removable inner ring which can be removed to increase the size of the bed as your puppy grows. As with all Danish Design dog beds, the My First Bed is soft and cozy, made from Sherpa Fleece.

### **Dog bed range by Danish Design**

Whatever sleeping style your dog has, there is a bed to suit. Large dogs prefer to lounge and spread out and the Box Duvets is a superbly comfortable dog mattress deep filled with thermal fibre.

We have not forgotten the active working dog. The Country range provides heavy duty, hard wearing waterproof dog beds, easy to keep clean.

It's not only the dog bed duvets that are high quality, but the dog coats products are also very stylish and well made with quality fabrics. The 2-in-1 coat with a removable fleece has been our best seller, but there is a style to suit every dog to keep them warm and dry during the cold and wet winter months.

Take a look at the [Danish Design dog beds](#) they can offer. If you cannot see the product you are looking for please contact them, they will endeavor to get it for you.
