

Shine Soaps: Brings A Redefined Experience To Natural Liquid Soaps Like Never Before

New York City, Jun 7, 2019 (Issuewire.com) - Shine Soaps, a natural soap producing company that is already known for evoking high-flying deeds when it comes to making available real natural products with a difference, proudly announces the launch of their two new sets of products, Liquid soaps - Lemon Morning and Tropical Mango, as well as Whipped Butters - Citrus Day and Wild Mango.

“All of the ingredients we use in all our natural products come from USDA certified suppliers here in the USA and all our products are all handcrafted in New York City. They are vegan-friendly and do not contain any kind of chemicals whatsoever.” Says Carlos Feitosa, Shine Soaps’ CEO.

The launch of new products was very anticipated by the natural skincare brand fans as it has been requested by many over the past year of operations. The new products come as an addition to the already popular line of bar soaps that share the name with the new liquid soaps. The complete lineup of products can be found on the company’s website.

Using natural ingredients such as olive oil and shea butter from sustainable sources in the US the new creations complement Shine Soaps' mission of making all natural products that are great for the skin and the planet.

About Shine Soaps

Shine soaps were founded by Carlos Feitosa, a high school student who moved to the US, from Brazil in 2015. Through his family farm, Carlos developed a passion for natural products and since then, Shine Soaps has 'bubbled' from a high school project to a real natural products business.
