

Mr Vinod Kumar Reddy, CEO, Zoylo Healthcare said, “In today’s hectic life, our health usually takes a back seat. A busy schedule makes it difficult to go for a health check-up and a person keeps postponing till it is too late! People usually consult a doctor only when there is a medical issue that gives them discomfort and delays right on time treatment. Over 25 lakh passengers use the Delhi Metro every day and Zoycare will offer them a convenient option to take charge of their health again. Zoylo Health Kiosks will help in early detection and diagnosis of many of the non-communicable diseases like diabetes, thyroid, cardiovascular disease, vitamin & mineral deficiencies at an early stage. This early diagnosis will definitely help people to seek timely treatment and stay healthy.”

While Metro has added speed and convenience in the way people commute, Zoycare will add convenience in accessing healthcare services while on commute. We welcome this progressive thought that will bring huge impact for Delhi metro passengers on a grassroots level.”

About Zoylo

ZOYLO is a revolutionary online healthcare platform that connects users to the entire spectrum of healthcare services creating a resourceful ecosystem of service providers and the users. Dedicated to extend the horizons of healthcare facilities and services beyond regional limitations and make it accessible to all under one roof, it stands as a synonym for healthcare digitalisation.

The platform allows doctor appointments and diagnostic lab test booking services across India through a rich network of healthcare service providers. Being associated with top-notch hospitals across the country, we offer end-to-end healthcare solutions to the users under one roof for unmatched convenience. We are marching towards every city and town in India to bring them up in our network for greater access to quality healthcare for everyone. Zoylo, with a vision to cover every single entity of quality healthcare under one umbrella, also offers online medicines, online doctor consultations, wellness and home healthcare services to give a wholesome experience to the users.
