Recently, Chandan Agarwal made a contribution sponsoring the education of 109 under-privileged school children through the Friends of Tribal Society. He has also committed to making a similar contribution every year for the rest of his life.

When contacted, Chandan Agarwal said "*Education is a right which should be accessible to everyone. Children should not be deprived of basic education for want of money. If my small contribution can help change few lives and families, I would be forever obliged and grateful*".

India needs more of such noble businessmen and professionals who contribute to making the nation a better place to live in. The Government is doing a lot for improving access to basic education in India, but such contributions by citizens goes a long way in shaping a better nation.
