SOFTWARE UPGRADE**

New York City, Jul 7, 2019 (Issuewire.com) - Coinsclone has recently upgraded its Cryptocurrency Exchange Software with high-end features in it.

On June 4, 2019, Coinsclone unveiled its [upgraded cryptocurrency exchange software](#) made especially for their clients! Coinsclone crypto exchange software has so far helped most of the global clients to achieve high profits based on their customized requirements.

“In the cryptocurrency market, there are over 200 functioning crypto exchanges. Anyhow, exchanges with high liquidity and security are the most preferred ones for the traders. Although the exchanges have a customer support feature, not every exchange is responsive to the customer’s queries. Therefore, we tried to integrate all these things to enhance our cryptocurrency exchange software to assist them.”, initiated the Chief official at Coinsclone!

“We usually have a habit of gaining feedback from our clientele once our product is being deployed to them. Depending on the feedback, we enhance and revise our exchange software. By now, with our collected feedbacks and started adding advanced features particularly with security as expected by our clients.” added the Chief official!

Coinsclone's [Cryptocurrency Exchange software](#) initially, the exchange consisted of the following features:

- Live Trading Statistics in Graphical Representation.
- Displays the Current Price of Cryptocurrencies.
- Multi-Language Support.
- Deposit & Withdraw funds anytime.
- KYC panel to eliminate future issues.
- Two-factor Authentication.

“To bring in comfortable trading for our clients we revamped the exchange software to put forth an intuitive user experience to them. As security has become a question in today’s crypto markets, we integrated top-level security features such as Fingerprint scanner, Face recognition to prevent fraudulent activities” continued the Chief Official.

To bring in multi-level security with easy to use interface in the cryptocurrency exchange software, Coinsclone had added a great set of features in it:

- Limit, Market and Stop order trading modes.
- Security options such as 2FA, Fingerprint scanner and Face recognition.
- Multi-Signature wallet.
- Attractive UI/UX experience.
- Advanced CMS.
- Integrated Wallet.
- Multiple Currency Pairing.
- Cryptocurrency Price Ticker API.
- Rest API.
- Margin Trading & Lending.
- Liquidity Options.

As of now, cryptocurrency exchanges supporting Mobile devices like Android, iOS and Web Browsers are commonly preferred by the traders. Coinsclone's Cryptocurrency trading platform is a cross-platform supported one where users can make comfortable trading.

“To allow your user base to trade at a predefined date, we have integrated Margin Trading in our Cryptocurrency Exchange Software which enables traders to buy and sell the currencies at any time they require. We enable our clients to manage & handle the pending transactions effectively through Blockchain Technology which we have implemented. I hope these features help our clientele!” ended the Chief official!
