Allergy and immunology involve the management of disorders related to the immune system. These conditions range from the very common to the very rare, spanning all ages and encompassing various organ systems. An allergist/immunologist, like Dr Tole, is a physician who specializes in diagnosing, treating, and helping prevent allergic diseases and disease processes affecting the immune system.

Internal medicine or general medicine is the medical specialty dealing with the prevention, diagnosis, and treatment of adult diseases. Physicians specializing in internal medicine are called internists.
