Standards Accredited by Temos Dental ISQua/IEEA

Temos

Trust • effective medicine • optimized services

Newport, Jul 30, 2019 (IssueWire.com) - Global accreditation leader, [Temos International](#), announced the accreditation of its dental standards by the prestigious [International Society for Quality in Health Care](#) (ISQua now IEEA). Developed in consultation with dental professionals, the [ISQua](#) accredited Temos Dental Standards offer tailored options for private practices, dental clinics, and dental hospitals to improve the quality of care for domestic as well as international patients.

The Temos Dental Standards includes two programs, “Quality in International Dental Care” and “Excellence in Dental Tourism”. Because no single accreditation program type fits the needs of every dental service, the Temos Dental Standards include distinct standards for Dental Hospitals as well as Dental Clinics & Practices, tailored to the particular needs of the patients served within different kinds and sizes of dental providers.

“The Temos ‘Quality in International Dental Care’ program is a choice for clinics & practices as well as dental hospitals that want to elevate their clinical and non-clinical services to the highest international standards. Independent confirmation from Temos demonstrates this commitment to their clients and patients as well as to their staff”, explains Dr. Claudia Mika, CEO of Temos. “With these newly accredited, comprehensive options, dental centers anywhere in the world can tailor the options that best suit the patients they serve and the settings where they provide those services”.

[Medical Tourism Training](#), a US-based consulting and training company working with health travel organizations worldwide, is the US, Caribbean, and Latin American representative for Temos. The company’s President, [Elizabeth Ziemba](#), adds: “As one of the 14 regional offices for Temos, we are very proud of the ISQua / IEEA’s surveyors’ feedback which highlighted Temos’ inclusion of cultural diversity as well as its exceptional detailed infection prevention and control standards.”

ISQua and its International External Evaluation Association (IEEA) are known as the “Accreditor of Accreditors” and recognized as the gold standard for global accrediting organizations such as Temos. It is the second time this year that Temos has been awarded accreditation by IEEA, the gold standard for global accreditation. Earlier this year, IEEA accredited Temos programs “Quality in International Patient Care” for hospitals and clinics as well as its “Excellence in Medical Tourism” standards for international patient care. Temos continues to improve and transform its accreditation programs to offer the very highest healthcare standards.

With the launch of the IEEA-accredited dental programs, [Temos](#) adds to its reputation as an innovator setting standards for quality, patient safety, risk management, and the patient experience.

Among its other industry innovations, Temos is the first international accreditation organization to create standards specifically for international patients, also known as dental tourists and medical tourists. It continues to raise the requirements for accreditation, adding value for its clients, their patients, and the governments, insurance companies, Embassies and Consulates, and other businesses that rely upon Temos quality.

Founded in 2010, Temos accredits hospitals and clinics, dental services, IVF clinics, physical rehabilitation services, and eye care clinics as well as medical travel coordinators (“facilitators”) or medical concierge services. With clients on five continents, the company is experiencing exciting growth and anticipates that ISQua/IEEA accreditation will increase confidence in the marketplace and accelerate its growth.

For more information about Temos’ accreditation programs, contact Medical Tourism Training, its US-based regional office, serving clients in the United States, Mexico, Central and South America, and the Caribbean.
