

Wondersoft POS Solutions Drives Many Leading Brands To Success!

Leading apparel, salon, spa, and retail brands taste success by employing smart POS solutions by Wondersoft

Chennai, Jul 17, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Leading POS solution expert Wondersoft has come up with retail business and POS solutions that have played a crucial role in the success of some of the leading clothing, salon & spa brands in the industry. Wondersoft has come up with unique [POS software](#) for the leading Salon and Spa chains like Trendz Salon & Spa, YLG salon, Hair Speak, Hair Masters, etc. Also, apparel brands like Indian Terrain, Toonz Kids Store, Europa, Palam Silks, Milow Fashion for Kids, and many more brands have tasted success by adopting POS software solutions by Wondersoft. Even the Global leaders like Adidas have zeroed in on Wondersoft for all their franchisee POS needs.

In addition to Apparel, [Spa and Salon POS solutions](#), Wondersoft also offers POS and business solutions in various market segments like Bakery & Confectionery, Lifestyle & Fashion, Electrical & Electronics, Food & Beverage, Supermarkets and Grocery, Footwear, Pharmacies & Healthcare. Some of the known names in the clientele list of Wondersoft includes CookieMan, Kumarakom, Reebok Nuts 'N' Spices, Hatsun, Aravind Eye Care, and Adidas.

The Wondersoft POS solutions help in bringing all the retail stores and their operations under one roof. This helps in saving valuable time, resources, and productivity levels. With POS Solutions, real-time visibility of the stocks in hand, and information about the flow of goods is just a click away! Palam Silks, one among the many customers of Wondersoft, experienced a drastic reduction in the time consumed for the rotation of stock from their Apparel warehouse to their stores located at different places. It also

helped in the decrease of pilferage during stock rotation. The Wondersoft POS solutions have also helped their customers to bag awards for their operational efficiency.

“Among our 900+ Franchisee stores, both Adidas & Reebok brands wanted to get real-time visibility of their stocks & sales for the integration of data into various analytical tools and futuristic applications. We evaluated the options available and narrowed down on Wondersoft to be our strategic partner of our Franchisee Store. The web-based eShopaid and eShopaid Mobile are applications are comparatively simpler and easier to use. It provides complete visibility and interfacing at the central cloud server. The entire implementation, which includes specific customizations, training of store staff and, migration of data, was completed within 9 months. We are delighted to have made the right decision by associating with Wondersoft and choosing this highly productive software for our Franchisee POS” - Mr Puneet Shankar, IT Director, Adidas Group.

Wondersoft's Microsoft .Net and SQL Server-based web and cloud solutions can easily integrate with the predominant ERP packages like SAP, Microsoft Dynamics, and Oracle. It offers real-time dynamic reporting and data availability in such a way that it is easily accessible from anywhere by making use of the Internet. Wondersoft provides both on-premise client and server licenses in addition to the Software. It is offered as a Service license which is billed per user monthly.

Wondersoft offers two different solutions for distributors and retailers. They are eShopaid and Shopaid.Net. The eShopaid is a web-based cloud software which is exclusively designed for all the retail chains and franchises with widespread outlets. Shopaid.Net offers features which can help in handling operations like POS & Billing, Store & Warehouse systems, and also other functions which can help in the office management of corporates. Wondersoft also offers Shopaid.Net distribution solution designed exclusively for the distributors. Shopaid.Net incorporate tasks like procurement, inventory management, order management, distribution, warehousing, payment, billing, payment, analytics, accounting, CRM, and reporting. It also includes all the features which are needed for the end to end supply chain management.
