

Baseapp Systems releases its new cloud-based saas, CuteHR for SME's

New Delhi based Baseapp Systems and software Pvt. Limited, the creator of wpoven web hosting services and IoT products in India, releases a new revolutionary automated HR management SaaS version 1.0 named CuteHR for small businesses.

New Delhi, Aug 14, 2019 ([IssueWire.com](https://www.issuewire.com)) - Baseapp Systems and Software Pvt. Limited, the New Delhi based software and hardware product and solutions company, has released its cloud-based HR automation software CuteHR version 1.0. The main emphasis of this application is to make it among the most powerful and friendly employee self service-driven HRMS for small and medium-sized organizations. Many powerful features have been added in the CuteHR application to streamline the repetitive and unproductive task in any business. The employee can perform all the HR and administration services without visiting the HR function or meeting the supervisor e.g. apply for leave, submit responses for appraisals, make claims, track work hours, manage goals, modify profiles, etc.

These services are integrated to a powerful [HRMS](#) product used by the HR function covering areas like Employee Life Cycle Management, Leave, Time, Attendance, Loans & Advances, Performance Appraisal, HR Administration, Claims, etc. Both are linked using a powerful approval workflow automating the entire activity in real-time. Based on the reporting relationships requests, approvals and updates of HR records occur in real-time.

The version is available on the Cloud on a SaaS (Software as a Service model) well as for in-premise use in organizations using its own servers, or its own private clouds.

According to Vikas Patial, Managing Director and Founder of Baseapp Systems, "Our vision is to create a common platform for the entire business to meet and collaborate on a single dashboard. With stronger communication and automated management, scaling small and medium-sized businesses becomes handy both for the employer and the employee"
