

Dan Holdings Develops Cryptocurrency Backed By Gold Commodities

Dubai, Aug 19, 2019 (Issuewire.com) - Dan Holdings has created an App that will soon put the value of gold back into the dollar. Crypto dollar that is. Dan's plans to market his "TeleChat" app will feature privacy-focused, blockchain, technology.

TeleChat is designed to provide financial services while helping users get more acquainted to the Goldchain network. In addition, a secondary app called, "Coin App" will launch simultaneously. Coin App provides users with a digital wallet and also includes a social networking app called, "Socialx".

Eventually, the goal of the Coin App is to enable users to pay for basic needs. Needs like paying for flights, booking hotels, or simply buying a cup of coffee. With cryptocurrency going full speed and Dan Holdings at the steering wheel, Coin App should change the world.
