

Eris Electrical Services Carries Level 2 Electrician Accreditation

Sydney, Aug 12, 2019 ([Issuewire.com](http://www.Issuewire.com)) - Eris Electrical declares that they are best placed to serve customers all through Sydney including Blacktown, Liverpool, Campbelltown, [Bankstown](#), Ryde, Penrith, Parramatta, Hurstville, Castle Hill and Sutherland suburbs. They have qualified, experienced and certified technicians to perform level-2 electrical works such as power pole installation, new meter installation, repair/replacement with the highest accuracy.

Whether the customer needs level-2 electrical services for a residential area or commercial/ industrial site, they can ensure that the level-2 work is performed adhering with the best practice industry standards. Their professionals are cordial and friendly and maintain a high standard of health and safety.

Eris Electricals' level 2 electricians firmly adhere to all the Australian Laws and Regulations to provide the highest standards in safety, competence, quality workmanship and customer care.

The company's spokesperson said, "Eris Electricals' professional team endeavours to offer the highest standard of level 2 electrician work for all its clientele". The spokesperson further added, "Eris Electrical is proud to provide some of the most practised and professional level 2 electricians to service Sydney suburbs".

The clear objective is to leave clients delighted with high-quality service deliverables. Typically, an expert [level 2 electrician](#) works on projects like disconnections and reconnections, underground service mains, private pole installations and replacements, as well as, lighting upgrades.

In addition, level 2 electricians have the know-how to offer cross arm installation, replacement and removal, overhead service mains, as well as, 3-phase upgrades and metering services. Moreover, level 2 electricians are authorised to work on or near Ausgrid energy and Endeavour networks, managing live wires and metering equipment.

The level 2 electricians can move/change the place of switchboards and/or mains; offer any power upgrades - disconnects/reconnects, upgrade metering requirements or provide the best recommendation. Eris Electricals' guarantee their work, so customers get complete peace of mind.
