

Thailand Company WaterMicronWorld International is Expanding Into Iran Retail Stores

Caspian Foolad Alborz Co. plans to bring Atmospheric Water Generators into Iran's own retail stores with WaterMicronWorld International Technology.

**For home or office,
we have the solution.**

AGW-30H/O

For decades people have been looking for ways to find a natural source of water that can be free from all pollutants. Today, industries can make it available from the air we breathe. Our new state of the art Water Generation Machines produces the purest form of drinking water available on the planet. Our sophisticated filtration and purification technology is unparalleled in reliability for human consumption.

Our AGW-30H/O unit is an effective stand alone water generator that provides membrane filtered, ultraviolet (UV) treated, hot, warm and cold water extracted from ambient air humidity. The AGW-30H/O eliminates the need of buying bottled water for daily consumption.

IWA International Water Association

INDUSTRIAL SIZE

AWG C-Series

Is an industrial grade water generator based on our proven technology. AWG-C-Series units can generate 250, 500, 1000, 3000 and 5,000 liters of pure drinking water per day.

CE

How it works

™ has the capability of manufacturing pure drinking water for even large industrial applications ranging from 250 to 5000 liters per day.

Greater Metropolitan Area, Aug 7, 2019 (Issuewire.com) - Caspian Foolad Alborz Co. has taken the initiative to bring Atmospheric Water Generators into Iran own retail franchise stores. "These retail franchise storefronts will serve two primary purposes, (1) in cities where tap water is questionable at the most we can provide a much safer and purer alternative along with convenience, (2) servicing our machines along with stocking parts and filters will allow us to handle customer needs or repairs in a much shorter period of time," stated Mr. Mahmood Eslami in a recent interview.

"In Iran & the Middle East, because of its poor municipal water quality throughout the country and with many local businesses, condo or homeowners have been the first to take advantage of the convenience of making water in their own premises. No longer is the need to transport bottled drinking water, especially with high fuel cost, traffic, and the driving time to get pure, safe drinking water," states Mr Eslami

Atmospheric Water Generators - Water from Air Technology, extracts water from the air and

converts it to pure and fresh drinking water. Atmospheric Water Generators are essential for everyone wanting pure and clean drinking water in these days without the threat of municipal contaminates, or transporting and storing expensive bottled water. No water source on this planet is as pure or abundant as water from our own air. Atmospheric water generators simply and reliably deliver safe drinking water from the air we breathe.

WaterMicronWorld International Atmospheric Water Generators household/office units extract water from the air from 15 to 30 litres per day, purer than any water source on the planet.

WaterMicronWorld International also manufactures large industrial Atmospheric Water Generators capable of producing 60,100,160, 200, 250, 500, 1500, 3,000 and up to 5,000 litres of water in a single day.
