

Anndy Lian: Industry 4.0 + Blockchain Changes The Way We Live, Work And Relate

Seoul, Sep 3, 2019 (Issuewire.com) - Anndy Lian, Book Author of Blockchain Revolution 2030 gave an opening keynote speech in Seoul at the Singapore-South Korea Immersive Program supported by Ministry of Education (MOE) Singapore, Skills Future Singapore and presented by Singapore Institute of Retail Studies and Nanyang Polytechnic.

In the keynote opening speech, Mr. Lian highlighted how blockchain technology plays an important role to transform and create a new model of the digital economy. “Blockchain technology has enabled new business models, innovative organizational forms and work processes. It has opened doors for many new possibilities. With smart contracts, reporting and monitoring of required data, checking of compliances, and approval processes will become easier than ever. This has also given policy makers more confidence to issue regulated securitized blockchain and cryptocurrency exchanges.”

Industry 4.0 is also one of the most talked-about topics. Industry 4.0 is an emerging era of connectivity and interaction among parts, machines, and humans. The fourth industrial revolution together with

blockchain will be established on trusted networks that remove the need for middlemen. Simple manual processes will be undertaken in an integrated way using digital, autonomous systems, this changes the way we live, work and relate to one another. Anndy who is also the Blockchain Advisor of Asian Productivity Organization (APO) mentioned to the audiences that we need to read more about the latest adoptions and plans made by international and intergovernmental such as APO. They provide the latest updates, trends and deep insights of emerging innovative business trends and solutions.

Kim Hyeong-joo, Chairman of Korea Blockchain Industry Promotion Association and Former Seoul Vice Mayor also presented his speech on South Korea as a nation embraces blockchain. "South Korea, the country that has been at the forefront of the crypto industry since 2017 and the nation is gradually changing its views regarding cryptocurrencies. While the lift on the ICO blanket ban was announced by the officials last month, the country has recently been vocal about its intention to lead the fourth industrial revolution, powered by blockchain initiatives. We believe that blockchain technology will change our lives."

The 3rd blockchain immersive program is held from 2-6 September 2019 in South Korea. In the past immersion programs, leading Korea companies like Samsung, Deloitte Blockchain Startup Advisory and Dunamu Upbit have shared their best practices. Delegations from Singapore such as Singapore Enterprise Singapore (Ministry of Trade and Industry), Health Promotion Board (Ministry of Health), Gov Tech, Singapore Armed Forces have benefited from the knowledge sharing session.
