

Blockchain in Oil & Gas Conference

Understand how blockchain technology such as smart contracts, distributed data, and public ledgers are transforming the oil and gas industry

Houston, Sep 5, 2019 ([Issuewire.com](http://www.Issuewire.com)) - The 3rd Annual Blockchain in Oil & Gas Conference will enable you to understand how blockchain technology such as smart contracts, distributed data, and public ledgers are going to transform your role in the oil and gas industry.

Attendees will explore what blockchain can do for the industry right now, with real examples of blockchain generating ROI for companies. There will be in-depth discussion around how common challenges can be overcome and the variety of ways in which blockchain can be used in the oil and gas industry today.

The speaker panel will share real-world issues, best practices, developments, and cross-discipline advances that address ever-expanding and complex data demands in today's oil and gas industry.

Bringing together upwards of 250 attendees from oil and gas, 30+ speakers and 30+ partners and exhibitors from leading technology companies to explore innovative technology and services on the show floor, network at multiple receptions, and learn the latest on the digital revolution that's transforming the industry.
