

DCR Strategies | TruCash Release Major Update to Their Award-Winning Mobile App TruCash Wallet

The app has been renamed to TruCash Wallet and will feature a brand-new design and increased security, among other key features. Now Available for Android and IOS.

Mississauga, Sep 11, 2019 (Issuewire.com) - DCR Strategies | TruCash announces a major update of their mobile app for TruCash Prepaid cardholders. TruTap, as it was previously called, will be rebranded to TruCash Wallet and feature a new design focused on improved

user-experience.

Protecting your data and funds is our number one priority. The TruCash Wallet App has been redeveloped from the ground up to minimize security breaches and fraud. Phone security has been strengthened with one-touch fingerprint identification to ensure that your account is easily accessed by you, and only you, quickly and easily. If your card is lost or stolen, you can use our unique TruCash “Lock” function to lock and “Un-lock” your account, preventing unauthorized access and usage.

As always, TruCash Prepaid cardholders will have access to features they already use such as available card balance, sending funds to other cardholders, tracking points and transaction history. This update will further enhance their experience by allowing them to monitor their usage and search past transactions on the activities tab by simply searching for a name, date, amount or merchant.

The new TruCash Wallet App, available now on the Google Play and IOS App Store, puts your account at your fingertips and allows you to manage payments and rewards on the go. Users can access their cards quickly and securely from anywhere in the world, in real-time, using the latest in cloud technology. The TruCash Wallet App will roll out as an update to existing users and will be available as a free download for new users.
