

Microtek Learning Become a Training Partner Of EC-COUNCIL

Microtek Learning Welcomes EC-Council Partnership

New Braunfels, Sep 10, 2019 (Issuewire.com) - It is the need of the hour to address Cybercrime. It is a pivotal issue. As life moves more and more into the digital sphere, cybersecurity gains more and more importance.

Our goal is to help our customers optimize their knowledge and succeed in today's digital world by providing convenient, high-quality technical training that our customers can rely on.

Cyber Security is one of the biggest threats in this world and even North America is not untouched , Microtek Learning is all set to give high-end technical training to individual and develop skilled security professional to minimize the skill gap in and around Brampton, Ontario and across Canada and USA, being a partner with EC-Council , we aim to achieve this vision of ours with their accredited certification

programs which will help students to have a better knowledge about Security, give them real-world scenarios and help them upskill.

Somdev Chaudhuri, Managing Director of Microtek Learning, quoted, “ With ever-changing technologies the world today is at a greater risk of Cyber attacks and internet threat, Microtek Learning understands the value of Cybersecurity and is aware of the security threat worldwide hence has geared itself to fill in the skill gap by training people to achieve the right knowledge and right skill set which can further help organization across the globe to fill in the security positions and minimizing the Cyber threats. Microtek Learning is a proud partner with EC-Council and believes that together, we will be able to get the right training and develop skilled security professional who will be able to minimize Cyber threats across the globe.”

Danish Arshad, Executive Director of EC-Council, quoted, "Industry leaders such as the President of IBM acknowledge that the demand for skilled security professionals is one of the biggest challenges facing the industry today, and it's only expected to grow; experts predict a shortage of 1.5 million open and unfilled security positions by 2020. This gap is further exasperated by a lack of the right skills needed to meet the modern security landscape. In the face of increasing threats, this is a shortage the industry cannot afford. Cybercrime will cost the world more than \$6 Trillion annually by 2021 (according to a recent report published by Cybersecurity Ventures) and with the Demand of Cybersecurity experts expected to rise to 6 Million globally by 2019 with a projected shortfall of 1.5 Million, cybersecurity personnel have become one of the most sought after resource that organizations are looking to invest in now. Another report by Cybersecurity Ventures also highlighted that the unemployment level in the Cybersecurity field being 'Zero' in 2016-17 is a clear example of the opportunities that individuals will be able to leverage after going through [EC-Council certifications](#) delivered by Microtek. These ANSI and DOD8570 accredited certifications are well recognized in the industry globally as well as Fortune 1000's, making them the ideal resource to acquire skill and accreditation in the Cybersecurity field."

Microtek Learning Inc. specializes in providing training and certifications on IT Technologies based in Brampton, Canada. Our blend of Online and In-Classroom training program helps students to learn new technologies and best practices and keep up with the ever-changing demand for qualified candidates. EC-Council

The International Council of E-Commerce Consultants (EC-Council) is a member-based organization that certifies individuals in various e-business and security skills. EC-Council is the owner and developer of the world-famous E-Council Certified Ethical Hacker (CEH), [Computer Hacking Forensics Investigator](#) (C|HFI), Certified Security Analyst (ECSA), License Penetration Tester (LPT) programs, and various others offered in 150 countries around the globe. EC-Council has certified over 200,000 information security professionals globally.

EC-Council certification programs are recognized worldwide and have received endorsements from various government agencies including the US Federal Government via the Montgomery GI Bill, the US Government National Security Agency (NSA), the Committee on National Security Systems (CNSS) certifying [EC-Council's Certified Ethical Hacking](#) (CEH), Network Security Administrator (ENSA),

Computer Hacking Forensics Investigator (CHFI), Disaster Recovery Professional (EDRP), Certified Security Analyst (E|CSA), Licensed Penetration Tester (LPT) program for meeting the 4011, 4012, 4013A, 4014, 4015 and 4016 training standards for information security professionals and most recently EC-Council has received accreditation from the American National Standards Institute (ANSI).

We are at the cusp of something new, as we are setting the industry benchmark. It is time to redefine cybersecurity.
