

Moonwhale Ventures Announces New Client in Real Estate and Space-Sharing Economy – Spacelt

Austin, Sep 19, 2019 (Issuewire.com) - Moonwhale Blockchain Ventures Inc. is pleased to announce Serbian-based Spacelt as a new corporate client.

Revolutionizing Traditional Real Estate and Space Sharing Market

Real Estate (RE) has traditionally been slow to embrace emerging trends, but things are starting to change. Blockchain technology has been at the forefront of technological advances alongside Virtual Reality, Artificial Intelligence & Machine Learning. These innovations can bring tangible benefits to all parties involved - sellers and buyers and tenants, real estate brokers, agents, and other professionals. According to Gartner, businesses built on Blockchain technology will be worth \$10 billion by 2022. Subsequently, by 2026, the business value added by Blockchain can grow to slightly over \$360 billion dollars. The fast-paced digital economy is calling for - Smart Investments in RE, backed by advancements in technology - modern assets with Value Added Service (VAS) - low operating costs with more flexible terms for consumer convenience - space transfer and timeshare. The current real estate ecosystem requires a major facelift to keep up with technological progress.

Spacelt will unlock the full potential of Sharing Economy and Space Sharing Market. In the sharing economy, there is an increasing demand for space products that are suited for short term use and with flexible terms and conditions that address the “buyer/space user” market. A niche and fast-growing market are creating a new ecosystem of space products that will address an increasingly mobile world where the demand for ownership based on stringent leases and unfavorable Terms & Conditions are quickly becoming outdated.

Powered by Blockchain technology & machine learning, Spacelt platform allows for seamless space exchange and transactions of till now unused space-products, based on consumers and buyers needs

and requirements. Spacelt platform essentially will deliver all space-sharing products not seen before in the Sharing Economy markets.

“Spacelt platform will bring together the entire ecosystem of RE (assets), and its conversion into Blockchain and cryptocurrency,” said Moonwhale Founder and CEO, Danny Christ. “Spacelt is creating a marketplace of modern products in RE that addresses high-quality assets and includes amenities with VAS. Therefore, it will drive value and more flexible, convenient product offerings.” he further described.

Eric Mwenda, Founder and Visionary behind Spacelt added: “Moonwhale Ventures shall assist Spacelt in Blockchain applications, fundraising and managing STO-related processes.” He further added: “Moonwhale will be involved in developing key collaterals that include the investor deck, marketing and financial strategy, and further play a key-role in overall strategy and business planning.”

About Spacelt

Based out of the Digital Hub/ICT Centre (City of Novi Sad, Serbia), Spacelt aims to unlock the full potential of the Sharing Economy by revolutionizing the concept of (Space as a Service) SaaS and bringing a new ecosystem of space services and products not envisioned in this digital economy era.
