

Phoenix-Based Infectious Disease Practice Expands To Three Locations

A Phoenix Magazine Top Doc Focuses On Keeping Patients Out Of The Hospital

Phoenix, Sep 4, 2019 ([IssueWire.com](https://www.issuewire.com)) - eInfectionMD, Arizona's fastest-growing infectious disease practice announced today the opening of three new clinics located throughout the Phoenix metro area. The one-year-old practice has seen tremendous growth since founding in July of 2018 by Dr. Madhu K. Murthy. The clinics are located in Scottsdale (92nd & Shea), Glendale, (75th Ave & Bell), and West Phoenix (W Loop 101 & McDowell). In addition to the in-office visits, eInfectionMD can treat patients online through the use of a secure video platform from their website.

All clinics and online visits are staffed by board-certified infectious disease specialists with special education on treating a wide array of infections including Valley fever, Urinary Tract Infections, HIV, STDs, Meningitis, Methicillin-resistant Staphylococcus aureus (MRSA), Pneumonia, Post-operative infections, Respiratory infections, Skin and wound infections, and more.

When asked why he started the practice, Dr. Murthy remarked, "The wait times to get into an infectious disease clinic could be as high as 6 weeks. I thought there had to be a better way". With complex infections becoming increasingly common, Dr. Murthy knew patients needed faster access to care.

Locations:

Scottsdale: 92nd St and Shea
8952 E Desert Cove Avenue, Suite 204
Scottsdale, AZ 85260

Glendale: 75th Ave & Bell
17560 N 75th Ave Suite D-420
