Orthopedic surgery or orthopedics is the branch of surgery that deals with conditions involving the musculoskeletal system. An orthopedic surgeon offers care to patients suffering from problems associated with the joints, bones, muscles, tendons, and ligaments. They perform surgeries to address trauma, injuries, tumors, infections, and other conditions that require surgical intervention.

Sports medicine is the medical specialty concerned with the prevention, diagnosis, treatment, and rehabilitation of injuries due to athletic activity. Sports medicine specialists are either orthopedic surgeons or primary care physicians who prescribe treatments for professional and amateur athletes. They are trained to address issues associated with nutrition, sports psychology, and substance abuse. They may also counsel athletes on injury prevention.

Dr. Kujawa was born in Amarillo, Texas. He has traveled extensively around the world.
