

We are ready with the new onscreen evaluation system.

On-screen evaluations system

Delhi, Sep 23, 2019 (Issuewire.com) -

- We promise you to give the best evaluation system as per your requirements.
- Our system enables the institution to manage all the hectic work in just one single of a mouse click.

Expedien e-Solutions successfully started a new system, which offers all the universities to check answer sheets online, under the [exam evaluation system](#), and it aims to reduce the time and cost of the universities in conducting examinations and to increase the level of accuracy in the results when displayed.

Still, our education institution follows descriptive examinations where the answer books are handwritten and manually evaluated. The main challenge of manual evaluation is that the evaluators come to the evaluation centre or allow the evaluators to carry the answer books. The allocation of answer books to evaluators and result publication depends on the performance of evaluators; now imagine an online system, where evaluators take one answer-book complete, instead of allocating a bulk number of answer books to all evaluators using a computer.

While **exam paper checking** process continues with many drawbacks, which are mainly by the teachers, as they need to check all the sheets one by one and all process of accuracy totally depends on the teachers' performance and sometimes the bulk answer sheets reading and checking lead to delay in the results and lacks accuracy. Moreover, if we need to know the process of evaluating the answer sheets through an online process then we should understand in such a manner as [answer script evaluation](#) provides a solution where the answer books are bar-coded to maintain confidentiality and scanned. The images loaded into the system and evaluators verify on-screen with the provision to do scribble, write, commenting, annotating onscreen. It would be a great help to evaluators if they can see the Question papers and Model answer books by side, with this system as it does.

Now every size of educational institutions is capable to own software as it comes with various variations and mainly designed as per the requirement and size of the institution. We designed this software to make the evaluation process more convenient and easy in comparison to the older days.

About the Expedien e-Solutions

Expedien e-Solutions are a global IT Solutions provider to companies competing for a business edge. We have achieved distinction by delivering technology solutions that customized to industry-specific processes and objectives.

From small to medium and large-sized businesses, our expertise enables them to realize their business goals, attain customer satisfaction, and maximize ROI.
