

Wooshtec expands in the United States and Canada

Meyer Laboratory and Wooshtec have signed a cooperation and distribution agreement.

Stockholm, Sep 16, 2019 (Issuewire.com) - Meyer Laboratory will act as an exclusive distributor for Wooshtec within North American ready mix concrete (rmc) market, covering all corners of the US and Canada.

Wooshtec and its Daily Cleaner ensures that a ready mix plant runs a fleet of clean trucks, and only spend 5 minutes per day on the job. The benefits are many, and in a competitive market, every one of these makes a difference.

Not only does the Daily Cleaner save time at the wash-out station, but additional benefits are: A clean truck ensures quality on the delivered concrete, its payload can be utilized to the maximum, no more jackhammering or chiseling of the mixer truck and a better work environment for truck drivers.

“Entering the North American market is a vital step towards the global establishment of better habits within the ready mix industry. The introduction of a proper preventative washout, and minimizing the reactive need for chipping and hydro blasting, is a more efficient way to run a RMC business. Cooperating with MEYER does not just put Wooshtec directly in front to all RMC companies and plants, but as MEYER focuses on service based cleaning solutions, I believe we have the same agenda – adding tangible value to our customers.” says Mr. Lodhi.

Wooshtec Daily Cleaner removes build-up inside the drum and keeps your concrete trucks completely clean. With installations in Scandinavia, we’re growing our network of distributors. The Daily Cleaner features a unique spray head, allowing recycled water to be used, thoroughly cleaning the inside of the concrete drum, including all sides of the helix shaped wings, removing all concrete build-up. Rigorous long-term trials have proven that Wooshtec Daily Cleaner maintains a > 99% clean drum. These are hard facts, making future, chipping, blasting or unnecessary downtime a thing of the past.
One investment – daily savings.

Meyer Laboratory was founded by Russ Meyer in 1978 with one goal in mind, to feed his family. In the past 40 years Meyer Lab has grown to be a North American industry leader. We currently have team members reaching every corner of North America with three manufacturing facilities located in Kansas City, Charlotte, and Winnipeg, Manitoba.

Today the company is run by Rusty Meyer, President of Meyer Laboratory.
