

April Leigh Faunce, BSN, Registered Nurse

Get to know Registered Nurse, April Leigh Faunce, who serves patients in Reno, Nevada.

New York City, Oct 4, 2019 ([IssueWire.com](http://www.IssueWire.com)) - April is a registered nurse who practices in Reno, Nevada. She works in both the Surgical Intensive Care Unit and the Cardiac Intensive Care Unit. The Surgical Intensive Care Unit is the multispecialty medical care center for critically ill patients who require surgery or are recovering from surgery, whereas the Cardiac Intensive Care Unit is a hospital ward specialized in the care of patients with heart attacks, unstable angina, cardiac dysrhythmia, and various other cardiac conditions that require continuous monitoring and treatment.

Ever since she was a little girl, April knew that she wanted to become a nurse. Years later, she went on to earn her Bachelor of Science in Nursing degree from Chamberlain University in Downers Grove, Illinois, followed by her Master of Science in Nursing degree from Duquesne University in Pittsburgh, Pennsylvania. She holds certifications in Advanced Cardiac Life Support and Basic Life Support. Additionally, she is a Stroke Certified Registered Nurse.

In order to remain up to date in her field, April is a member of the American Association of Colleges of Nursing and the International Association of Forensic Nurses. She is also a recipient of the Daisy Award, which recognizes extraordinary nurses by honoring them nationally and internationally for the work they do for their patients and families every day.

A Registered Nurse is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role of treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, as well as assisting with patient rehabilitation and follow-up.
