

Author Talyn Gore Releases New Romance Novel - Dream Lover

Indianapolis, Oct 7, 2019 (Issuewire.com) - Author Talyn Gore Releases New Romance Novel - Dream Lover

Author Talyn Gore is pleased to announce the release of her new romance novel, Dream Lover.

So, here I am sitting on a parko bench at five o'clock in the afternoon, waiting for my dream girl to arrive. Mind you, I don't know if she's actually real. I mean "real" like a live person or if she is just a figment of my overactive imagination.

I've probably already lost you as you are reading this and I haven't even gotten started yet, so let me just clarify this for you. When I say "dream girl" I mean just that...the girl I've been dreaming of for the past few months who is supposed to be meeting me here, today In. Real. LIFE...at least I hope she does.

So "why" you ask me, am I sitting here waiting on someone who I have only seen in my dreams? Well, in my dreams she told me she is real and that she has been dreaming of me also, but (as you will find I have a habit of doing) I'm getting a little ahead of myself.

Let me start from the beginning so that maybe you'll understand that I'm not delusional to be wasting my time on someone who may or may not be real. Long story short, last night and most every night for

several months now I have been having dreams of the love of my life and our growing relationship and life together. It may sound weird but bear with me.

My name is Eli Gaut. I'm a thirty year old successful business owner from Phoenix, Arizona who does not, in any way, have a personal history of mental illness, nor does anyone else in my family; at least not anyone that I know of, although some of my family members are questionable characters. The following is my story...

About the Author:

Talyn Gore is a small town girl from northern Indiana; a hopeless romantic at heart. She has had a passion for reading since childhood but lives for a good romance book. She currently lives in South Bend, Indiana with her husband who helps to inspire her novels' erotic, hot and steamy sex scenes.

To her there's something seductively romantic about nature; the trees, the streams, or a gentle breeze blowing in your hair. She loves traveling to our nation's National Parks and hiking. And, it goes without saying that she loves books that help her transform her world into an adventure within the comfort of her own home.

Talyn will be the first to admit that she has a very active and naughty imagination when it comes to sex, but nothing compares to what goes on in her dirty little mind. She loves being in an imaginative world where anything is possible and her disabling pain from MS doesn't exist.

Talyn has a special knack for twists and endings that her readers won't see coming. Having found semblance of solace through reading her favorite romance/erotic authors she has been able to create her own characters and situations in her erotic books.
