

Nuttee Bean Co.™ presents FAVALICIOUS™: Snacks as they've never bean before!

A highly exclusive ingredient list, but an all inclusive guest list

Miami, Oct 29, 2019 (IssueWire.com) - Since day one, the goal of Nuttee Bean Co.® has been to create clean-label snacks that can be enjoyed by anyone and everyone, regardless of dietary restrictions or food allergies. Excitingly, Nuttee Bean Co.® is rolling out their new packaging, developed with the help of their customer base and Package Designer Sarah Wielusz. Coupled with new non-GMO and Kosher certifications, FAVALICIOUS® (as the name suggests) is the hottest new fava bean-based superfood snack, and (as the name also suggests) is 100% delicious. These fava bean snacks are also gluten-free, certified vegan, palm oil-free, trans fat and cholesterol-free, low sodium, and free from the top eight major food allergens. FAVALICIOUS™ is currently being sold on Amazon and Nuttee Bean Co.'s own marketplace and will be hitting store shelves very shortly.

THREE MOUTH WATERING FLAVORS

While developing new packaging and improving the oil used for roasting, three delicious and exceptionally balanced new flavor profiles were perfected:

- **Chili & Lime:** Is it getting hot in here? The lime arrives just in time to put out the fire starting in

your mouth

- **Wasabi & Ginger:** A wasabi kick to the tongue, nose, and eyes (in a good way), followed by soothing ginger to make it all okay again
- **Salt & Vinegar:** Thought this flavor was good on chips? Somehow it's even better on fava beans

Favalicious® fava beans are manufactured in an exclusive, allergen-friendly “fava bean only” facility in order to eliminate the risk of cross-contamination with food allergens such as peanuts or gluten, making them a healthy and safe snack choice for the 32 million Americans living with food allergies.

Favalicious® is the only whole roasted fava bean in the market with a signature belt (other accessories sold separately), and the beans are small-batch roasted in expeller pressed high oleic sunflower oil, keeping them palm oil-free.

It's not just about what ISN'T in Favalicious® fava beans. Fava beans are a small but mighty nutrient powerhouse that appears to have mostly slipped under the superfood radar until now. Each bag of Favalicious® contains 14 grams of protein (making it a great alternative to nuts) and 16 grams of fiber (making it a great alternative to prune juice). That's right, these tasty treats contain more fiber than a whole avocado. What's more, they are delicious and highly addictive. You've been warned.

“Our promise is to deliver everything you need in a snack. No Junk! Everything you need, nothing you don't! We're thrilled to be launching the great-tasting and great-for-you Favalicious®, so it may be enjoyed by all types of snackers.” says Nuttee Bean® Co. founder and fava bean enthusiast Frank Guido.

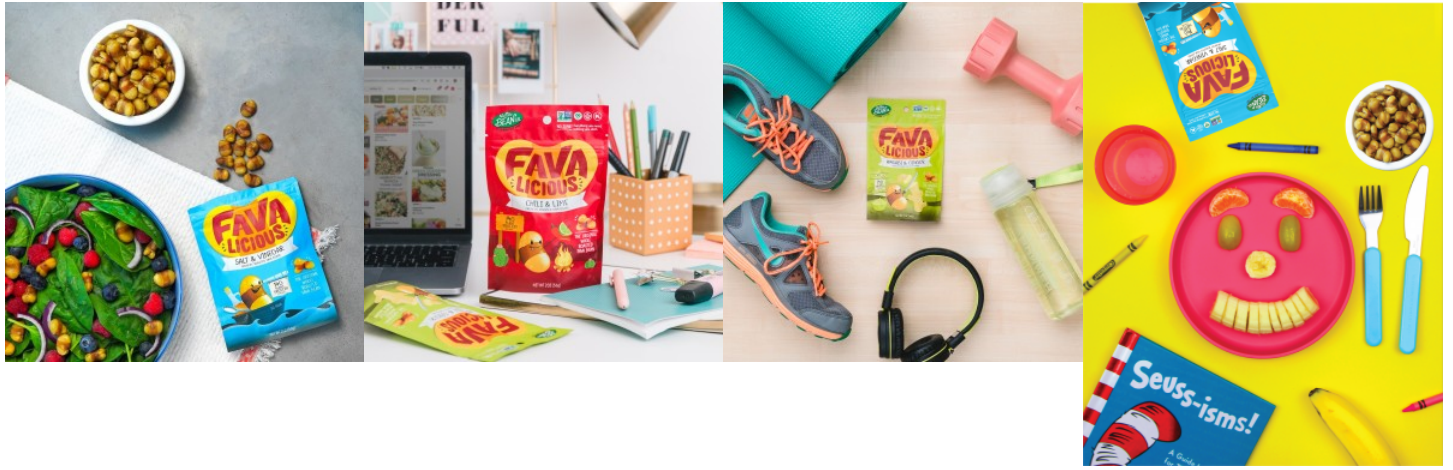

About Nuttee Bean Co®.

Nuttee in name and nuttee in nature, Nuttee Bean Co® is committed to offering quality, healthy, non-allergenic, flavourful, fun and affordable products with mass appeal. Nuttee Bean Co® began producing allergy-friendly snacks in 2017 to introduce the US market to the great-tasting and healthy snack potential of the humble fava bean. Focused on developing delicious, healthy snacks in an era where food allergies are increasingly prevalent and consumers are increasingly mindful, Nuttee Bean Co® has arrived just in time.
