- Glass and metal coatings
- High-performance coatings and functional coatings
- And at last powder coating.

Industrial Paints and Coatings

Taralac is a brand that offers a wide range of high-performance coatings for transportation and industrial infrastructure, corrosion protection, machinery OEM, and many more. Their industrial paints and coatings are designed to protect customers' assets in the most demanding environmental conditions. While this industrial range includes products for application on various metal surfaces such as mild steel, stainless steel, aluminum, galvanized steel as well as masonry or RCC substrates.

Wood Coating

Taralac is not only [industrial paint manufacturers in Ahmedabad](#) but they also offer a huge variety of premium wood finish products that meet the unique requirements of their customers and also country and regional regulations. They offer products ranging from basic wood polishing materials to advanced wood coating solutions. Their products cover the entire spectrum of wood coating processes like preparation of wood, sealing or priming, tinting, and topcoats.

Automotive

Moreover, Taralac doesn't stop here, they even cover the automotive industry and provides car and luxury vehicle coatings, automotive OEM coatings, commercial & utility vehicle coatings, bus body paints, two-wheeler coatings, wheel rim coatings.

Further, they even offer agricultural, construction, and earthmoving equipment, engine, and spare parts, helmet & bike accessories coating, railway coatings, and even special paints and coats for defense vehicles. Not just metal coatings, Taralac also produces special chemicals for coating plastics such as FRP, GRP, PP, and ABS.

Decorative

Taralac also manufactures a variety of products that are consumed in various fields such as decorative paints for your houses and industries.

- **Marvel Wall Primer**

Marvel wall painter from Taralac is a water-based primer that hides stains caused by water, solvent-based inks, crayons, ball-point pens, coffee, grease, spices, cooking oils, nicotine, and smoke.

Advantages

- Great in hiding stains
- High opacity and whiteness
- Prevents migration of stains through the paint film
- Also seals powdery surfaces like distemper
- And is recommended for exterior and interior applications

- **Classic Cement Primer**

Classic cement primer is a perfect choice to apply it on the plastered walls, concrete, and brickwork because it comes with good sealing properties and resistance to moisture and alkalies.

Advantages

- High opacity and whiteness
- High area coverage
- Suitable for interior applications

- **Acrylic Distemper**

This distemper from Taralac is a water-based acrylic distemper that gives a matt finish on your walls. It is available from Taralac in two ranges: Marvel acrylic distemper and Classic acrylic distemper.

Advantages

- Smooth finish
- Better washability
- Available in a range of readymade shades and bases

- **Marvel Interior Emulsion**

After the primer and distemper, you will need Taralac's Marvel interior emulsion that will help you to get the premium look for your walls. This emulsion adds elegance to your walls with its smooth matt finish. Moreover, this emulsion also offers high washability that will help you retain it for a long time and will protect your walls from fungal growth and black spots.

Advantages

- Extra smooth finish
- High opacity and coverage
- High washability with low dirt pick-up
