

NuType: Revolutionizing the Laptop Typing Experience

A Wireless Mechanical Keyboard That Fits Perfectly With Your MacBook, Surface, iPad and mobile devices.

Hong Kong, Nov 29, 2019 ([Issuewire.com](https://www.issuewire.com)) - We are NuPhy. We've developed the world's first mechanical keyboard that perfectly matches MacBooks and Surfaces. Not only can it provide a great typing experience for your laptop, but it also saves you desktop space!

NuType is designed to give you a great typing experience, but at the same time, you can continue to use everything you are familiar with, such as Force Touch Trackpad, Touch ID, Touch Bar or function keys. Thanks to the use of low profile mechanical switches, NuType is one of the smallest mechanical keyboards on the market. It can also pair with up to 3 different devices via Bluetooth, allowing you to switch between devices effortlessly, including Android phones and Windows PCs. In order to increase its portability, we designed a SmartCase especially for NuType, which not only protects your keyboard but works as a stand to hold your mobile devices, helping you work on NuType anywhere at any time.

We have completed small batch production, quality testing, and functional testing. The earliest participation in Kickstarter will result in the highest discount and priority in shipping. In addition, we have a one year warranty. Pre-order now on Kickstarter and get 40% off!
