

Reliable Wire Crimping Machine Manufacturer in China

Cheers Electronic Technical Co., LTD has been established for 30 years manufacturing Wire crimping machine and Cable stripping machine.

Songjiang, Nov 29, 2019 ([Issuewire.com](http://www.issuewire.com)) - Cheers Electronic Technical Co., LTD has been established for 30 years manufacturing Wire crimping machine and Cable stripping machine.

Shanghai-based wire harness machine manufacturer has proven itself as a leading wire harness company in the world and has served large global companies such as Bosch, Honeywell, Delphi, and Lear Corporation. Cheers Electronic Technical Co., LTD or better known as terminal-crimping.com, is a leading company that manufactures a wide range of wiring harness equipment. This company has been established for 30 years and strives to serve its customers like a king. Like any other big company, Cheers Electronic Technical is always keeping consistency and excellence in maintaining the quality of its products. The company has a solid R&D team in developing and manufacturing a wide range of wire harness machines to suit the latest requirements of the home appliance, medical instruments, toy industries, and automotive electric industries.

Cheers Electronic Technical is manufacturing two main products include Wire Terminal Crimping Machine and Wire & Cable Stripping machine. Wire crimping machine is a tool for combining the two ends of the Cable or metal in such a way so that they joined together. Wire crimping machine is applied to connect the connector to the end of the Cable. In the telecommunications industry, crimping tools are used to connect telephone cables and network cables. Meanwhile, wire & cable stripping machine is engineering equipment that is used to cut out the insulation materials wrapping around an electrical wire.
