

RSA LIST SERVICES Expands its Fortune 500 Executive Database

RSA LIST SERVICES compiles the largest Executive Email Database of Fortune 500 and Fortune 1000 Companies.

West Palm Beach, Nov 20, 2019 ([Issuewire.com](https://www.issuewire.com)) - Robert Acoca, CEO of RSA LIST SERVICES, announced that the company has expanded its Fortune 500 and Fortune 1000 Executive Email Database, to over 260,000 executive contacts.

This database has exclusive and valuable contact information of key CXO executives and complete management teams of IT Department, Sales & Marketing, Human Resources, Finance, and much more... of all the Fortune 1000 corporations, starting from the Fortune 500 companies down.

The RSA LIST Fortune 500 Database (<https://www.fortune500executivelists.com/>) gives you access to over 260,000 executive decision-makers of the Fortune 500 and beyond in biotechnology and pharmaceuticals, Telecommunications, Utilities, Software, Hardware Companies, Internet, Media & Entertainment, and many more.... From the CFOs, CIOs and CTOs, to VPs and Managers in IT, Each record includes the company name, full address, and the name of key decision-makers at the C-level & V-Level with their email addresses, company revenues, and number of employees. This database will give you exclusive access to the most powerful executives of Corporate America.

The database comes in an Excel format (csv) and includes company name, corporate website, contact name, title, department, address, phone, fax, email, sales revenues and number of employees, and the industry sector the company is involved in. Data can easily be uploaded to Email Servers, Salesforce and any other CRM

For the companies targeting the Fortune 500 companies, this is a must-have a database, that cannot be sourced out anywhere on the market and will give you instant access to the top-level contacts you're looking for.

" What we are offering to businesses is an exclusive email database of Fortune 500 companies that no other database company on the market can deliver" states Robert Acoca, CEO of RSA LIST SERVICES

" Our customers have been asking us for data that they cannot access when they deal with list brokers, data management companies, and even Fortune Magazine ". When you find a company with Fortune 500 Executive emails, they need to approve your email content, and then have you initiate an email campaign through a third-party service provider, without you seeing or ever accessing the email database".

What we do is deliver an email database to you, that you can use as frequently as you want throughout the year, with no restrictions whatsoever." states Acoca.

About RSA LIST SERVICES

RSA LIST SERVICES is a leading Direct Marketing Company and provider/compiler of exclusive business-to-business sales and marketing databases and lists. The company compiles exclusive business databases of leading corporations across the United States and provides critical contact information on key executives and top management of growing corporations in the telecommunications, financial services, high tech, contact centers, pharmaceutical, and many other dynamic industry verticals.

RSA LIST SERVICES clients use its databases for direct marketing, database marketing, analyzing their customers and developing their sales and marketing strategic planning. Contrary to list brokers and compilers, RSA TLIST SERVICES delivers the databases to its clients, allowing them to use the data for email marketing, direct mailings, and telephone lead generation.

RSA LIST SERVICES is not affiliated with Fortune Magazine and uses only the rankings of public information on the largest US companies ranked by Fortune Magazine
