

Get 5 kg ONION free with Resto Sense; an AI-powered cloud-based restaurant management system!

Indore, Dec 11, 2019 (Issuewire.com) - [Sixth Sense It Solution](#), Indore, is offering 5 KG FREE ONIONS to restaurants, with their Restaurant Management tool, **RestoSense!**

Yes, you read it right! With their restaurant management tool, RestroSense, they claim to manage your onion stock (and other raw material) up to the gram and make sure none of your food items consumed

(even a single onion) than required, and helps you avoid its theft as well.

Those who don't feel tears while peeling off onion are also full of tears. Well, of course not of onion, but its high priced rate consistent over some time!

Onion price per kg is varying from Rs 100 to 160+ at some places! We the Indian, who loves to eat onion from breakfast till dinner, are looking for ways to minimize its consumption and waiting for days when it will be cheaper to consume.

Restaurants are also on the same track. Their food cost has been increased significantly because they prominently consume onion the most. To help them out, Sixth Sense It solution is offering them **5 KG free onion** with their cloud-based, AI-powered, [Restaurant Management tool!](#)

As per **Sixth Sense IT Solutions**, this tool not only manages your restaurant but tracks every KG or gram of the onion or other raw material to make sure you don't miss any single onion, or use excessively than requirements. You can maximize your current inventory usage to the next level and make sure your restaurant serves food to your lovely audience at the same price BUT with ONION!

They also say that you can decide and fix the amount of onion and other ingredients going to be consumed in a dish cooking. You can also avoid costly raw material items waste with this tool as well.

An engineer from Sixth Sense It Solution, Indore, will come to your restaurant to let you show how you can maximize your inventory usage and use the same 5 KG of onion to more number of times than before!
